In stock form, these cars are performance-oriented street machines with plenty of get up and go, but this Caddy has been taken a step further with Lingenfelter performance accessories, making this the perfect mix of luxury and speed. With just over 15,000 original miles on the 6.0L LS1 motor, the transmission is the stock 6-speed, so you can slam through the gears yourself and make every minute behind the wheel an exhilarating and fun experience that will be hard to forget. With the ability to drive at extremely high-speeds, this Cadillac is still safe and controllable, with more modern conveniences such as traction control, power steering, and power disc brakes. It isn't just a stripped-down race car either, with an accommodating black leather interior with side bolsters to hold you in place during hard cornering. With the black paint, black interior, and tinted windows, the car has a rather menacing and imposing look that will make you the envy of all others who catch a glimpse of this beauty speeding down the road. This CTS V comes highly-optioned, with A/C, AM/FM radio, CD player, cruise control, GPS, heated seats, lumbar support, power brakes, power steering, power locks, power seats, power sunroof, power windows, anti-lock brakes, tilt wheel, traction control, keyless entry, driver and passenger airbag, leather interior, and radial tires. Located in our Detroit showroom, this 2007 Cadillac can be viewed in greater detail, including HD photos and video, at www.GatewayClassicCars.com, or call (313)-982-3100 for more information.
