## 1970 Cadillac Fleetwood

I have a 1970 Cadillac Fleetwood, black on black. The body is straight and very little rust spots, and the spots are small. The interior is incredible for a 1970. Power Locks Power Windows, no partition in between the front and back glass. Very cool car. This car was purchased as a project, as it was dream car of mine growing up. The car has every component however, the engine is donzo. I haven't taken it anywhere to know exactly what is wrong, but a buddy of mine who is a new BMW mechanic, after a brief look said it was no bueno. Either major work, rebuild, or new engine will be needed. However past that, this car doesn't lack much work to be show car quality. The car has a clear Texas Blue Title.
