

[Cadillacs For Sale by owner ::](#)

1998 DeVille

My Grandmother has owned this vehicle since new and last year she was denied her Drivers License. She then gave it to my Nephew that drove it for a few months and then lost his driving privileges. My sister gave the car back to Grandma and grandma asked me to sell it for her or keep it. I have too many toys to keep it. I have been driving this car now for a few weeks and it drives very well, I drove it to Iowa and back last weekend and got 24mpg out of her. The A/C is ice cold, she had new tires, Brakes and a tune up done last year, she took immaculate care of it. I would drive this car anywhere. There are a few rust bubbles starting on the hood but the rest of the car is completely rust free
